

Docket No. 2360-0359P

IN THE CLAIMS:

Please amend the claims as follows:

A2
4. (Amended) The method as claimed in claim 1, characterized in that, for each module, at least one event table is generated in that a search is made in the database for predetermined protocol parameter values identifying a particular event or for combinations of protocol parameter values and the corresponding records are wholly or partially stored in the event tables.

A3
7. (Amended) The method as claimed in claim 1, characterized in that the system quality value is calculated with respect to a grouping criterion by a scalar multiplication of a module quality vector, the components of which are the module quality values of the individual modules, by a module weighting vector, the module weighting vector being dependent on the grouping criterion.

cmk*
8. (Amended) The method as claimed in claim 1, characterized in that the system quality values are displayed graphically, particularly as a histogram.

9. (Amended) The method as claimed in claim 3, characterized in that the system quality values are correlated with one another with respect to various grouping criteria.

Docket No. 2360-0359P

10. (Amended) The method as claimed in claim 2,
characterized in that at least a speech quality, a duration for
establishing the test connection and location, time, speed and
direction of movement of the mobile terminal are acquired as
external system protocol parameters.
